Our Background

GAZTEC Group was established in the Mid 90s with the purpose of contributing to the growth and development of developing countries, especially African nations, by transferring modern applications and knowledge to the areas in question. We started with the establishment of a boat factory in Angola, which was the first of its kind in West and Central Africa. With the slogan “Manufacturing Environment — Friendly Boats,” the company aimed to provide training and to develop personnel proficient in production skills and able to contribute actively to the national industry. In this manner, we were able to manufacture, in a country where most of the citizens depend on fishing, high-tech, modern boats at a cost much less than that of imports.
